

Place: Web Ex (CALL-IN ONLY)

Date: 12/03/2019 Time: 1:00PM - 2:00PM

Attendees: Kevin Coyne (DNR), Rowland Agbede (MDA), Gary Maragos (MDP), Scott Hansen (MDP), Marshall Stevenson (SHA/WBCM), Bill Fearington (DHS), Lisa Lowe (DoIT), Conrad Schaefer (DoIT), Jason Ramsey (JMT).

Agenda

Introductions

Maryland Enterprise Software & MD iMap 3.0 Update – Lisa Lowe

- Conrad updated the MD iMap Production server from version 10.7 to 10.7.1 of ESRI's ArcGIS Enterprise on November 22nd and 23rd. Available patches were applied.
- DoIT is looking to transition to a new way of handling service updates. Services will be assigned to a designated schedule and publishing will take place during a designated time period. Lisa and Sam are reviewing services and drafting a schedule.
- 1Spatial platform license transition from MDP to DoIT. Will allow extension to February 12th 2020.
- 1Spatial will provide a demo on December 5th at DoIT.

Subcommittee Updates

Training – Lisa Lowe

- Looking at TORFP for training to extend another year. Current contract goes through end of 2019 calendar year.

Centerlines – Marshall Stevenson

- Formally established agreement for Waze. Accessible in organization, not public. Looking at how to implement into AVL proximity.
- Sign Inventory data and apps are available from the [MDOT GIS Open Data Portal](#) site.
- The Project Research Tool is available from the [MDOT GIS Open Data Portal](#) site. The tool is an internal app but available externally, just no secure data layers will load in the app.

Composite Locator – Lisa Lowe

- Users are receiving strange error messages when using ArcGIS Pro while signed into AGOL. Lisa is investigating this issue.

- Was working on regional locator with D.C. but was incredibly slow and will need to be investigated. It was taking all day to geocode about 100 addresses. May try to work with Virginia, Pennsylvania or Delaware to see if it works faster.

Imagery – *Lisa Lowe*

- Kickoff meeting occurred for 2020 imagery.
- 2019 Eastern Shore Imagery will not be hosted on iMAP until Spring 2020 due to caching. First 13 levels process very quickly. Last 2 levels are slow. The image service may be available sooner.
- 2019 Eastern Shore Imagery is being delivered to counties.
- 2019 Eastern Shore Imagery is available (no TIFFs) through the Sanborn FTP site. Please contact Lisa Lowe for credentials should you want to access the data.

Lidar – *Kevin Coyne*

- There is a planned 2020 flight for the Lower Eastern Shore (Wicomico, Worcester, Somerset) but there is limited information at this time. It is being funded by USDA-NRCS.

Additional Business

- None
